## Is a simple sofosbuvir plus ribavirin regimen suitable for difficult-to-treat hepatitis C patients?

The Liver Meeting 2012, the recent 63rd Annual Meeting of the American Association for the Study of Liver Diseases (AASLD) in Boston. Reducing the ribavirin dose, however, lowered response rate

## Sofosbuvir; The final treatment of Hepatitis C

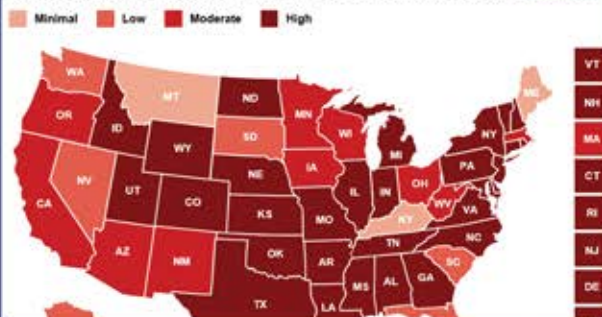

A 3 month of once-daily regimen of Sofosbuvir and Ribavirin, two direct-acting hepatitis C, produced sustained virological response rates for treatment-naive patients in the 90% to 100% range. Sofosbuvir is currently in Phase III clinical trials. ↑

## More states reporting high flu levels

By CNN Staff  
January 18, 2013 - Updated 2:19 GMT (05:09 HKT)

Flu-like illness activity level: Week ending January 12, 2013

The map below shows the proportion of outpatient visits to health care providers for flu-like illness. It does not measure the extent of geographic spread of flu within a state. For more information, see the CDC's FluView tracker.
